

Harvest Hop IPA

At the end of every summer, hop lovers across the nation rejoice at the arrival of hop harvest season. This is the only time of year that brewers can take hop cones right from the plant and use them fresh in their beer. This process of using fresh instead of dried hop cones in a beer results in a unique beer that showcases the hop's flavor and aroma.

Black Bear Brewery is proud to offer our **Harvest Hop IPA** this September. We used organic, locally grown and harvested Cascade hops. This beer is a copper colored IPA with intense citrus notes from the fresh hops. It is 6.2%ABV.

Remember, this beer is only available once a year, so get it while you can. Available in limited quantities at your favorite bar and in Growlers from the brewery.

Think local, drink Black Bear!
